Downside Price Protection

Date: _____

Name: _____

Account Number: _____

Future Gallons downside price protection (gallons purchased minus gallons delivered as of price protection purchase _____ x 95 cents = \$ _____

Customer Signature: _____

Downside Price Protection is for remaining 2008-2009 contracted gallons or thru 6/30/2009 whichever occurs first. Downside Price Protection will be in effect upon receipt of payment and signed form. Prior deliveries will not be re-priced.

The enrollment period for downside protection, which is normally only available at the beginning of an enrollment period, has been extended to all residential heating customers for a limited time for the original cost of 40 cents per gallon. This offer super-cedes all previous offerings and may be withdrawn or changed without notice. As winter approaches the cost to purchase the downside price protection can change daily or even hourly, so please check our website daily (www.petersonoil.com) or call 508-368-1111 for the current rates.

Downside price protection allows customers to pay the lower of the customer fixed/prepaid price or the current market price that Peterson Oil Service offers on a daily basis, whichever is lower up to the contracted amount.
